If you are in need special accommodations, please contact your local CCE office.
If you are a beginning farmer or would like to know about the finances of your farm business, this is the class for you. We will start with basic bookkeeping and inventories and move on to accrual accounting, depreciation, and profitability measures. This will be a small classroom situation that allows for lots of questions and one-on-one with the instructors.

By the end of the class you will have a good system to track your income, expenses, and inventories in the form of a farm business summary. We will go on to help you develop a plan for 2013 to improve profitability.
