If you are thinking about applying for a Master of Engineering in Aerospace, Mechanical or Engineering Mechanics you can find out more information about the program at http://www.mae.cornell.edu/mae/academics/graduate/meng/index.cfm.

MEng Admission Requirements for Cornell University Undergraduates

Fall admission deadline is **February 1**.

Steps to apply:

1. Application: Visit the Graduate School [http://www.gradschool.cornell.edu/admissions/apply](http://www.gradschool.cornell.edu/admissions/apply) and fill out the application online for the semester in which you will actually be a graduate student (for early admits not the first semester where you will still be an undergraduate). An application fee of $95 is required. Do not be overly concerned about selecting a concentration or research interest; you have to pick one in order to continue with the application process but it does not matter for M.Eng. admission purposes.

2. Statement of Purpose: This can be submitted online with the application. Your statement of purpose should be 2-3 paragraphs about why you want to earn your M.Eng. degree.

3. Letters of Recommendation: If you have a GPA of 3.0 or above, you will need one letter of recommendation from a faculty member; if your GPA is below a 3.0, you will need two letters of recommendation. (It is rare for a student with a GPA below 3.0 to be admitted; it would be considered a provisional admit requiring a 3.0 in the first semester of the M.Eng. program to continue in the program). You can request that letters of recommendation be sent electronically by supplying the e-mail address of the recommender.

4. Transcripts: You do not need to send a transcript.

5. Graduate Record Exam: Cornell Undergraduates do not need to submit GRE Scores.

**Early Admission**

If you are graduating in December and would like to apply to be an early admit in the Fall the admission deadline is **February 1**.

Cornell applicants may apply for early admission to the M.Eng. program if you have between one and eight credits left to complete your bachelor’s degree.

For early admits, the last semester of your undergraduate program serves as the first semester of your M.Eng. program although you are not officially a graduate student until you complete your B.S. degree.

The steps to apply are the same, except you will also need to complete an Early Admit Petition available for download at [http://www.mae.cornell.edu/mae/academics/graduate/meng/forms.cfm](http://www.mae.cornell.edu/mae/academics/graduate/meng/forms.cfm). This petition must be signed by your undergraduate field coordinator and handed in to the MEng Mailbox in 108 Upson Hall. Online application for admission should be submitted for the semester you will be enrolled in the graduate school (Spring Early Admit applies to the Graduate School for Fall admission, Fall Early Admit applies to the Graduate School for Spring Admission)
