Forage Brassica Types

- Turnips
  - Leaf-Type
  - Bulb-Type
- Swede/Rutabaga
- Radish
- Rape
- Kale
- **Chicory**

Brassica Advantages

- Palatable
- High digestible energy, low fiber
- Leaves: High Protein and Energy
- Bulbs: High Energy
- Low establishment costs compared to some other annuals
Brassica Disadvantages

- High costs compared to perennials
- Feeding concerns
- Possible soil erosion

Research Plots

- Four sites, five trials
- Three variety trials, two no-till establishment trials
No-Till Trials

- Extending pilot research by Fay Benson et al. in 2007-2008
- No-till planting into sod, with or without vinegar to suppress sod growth
- Results: No-Till into sod was uniformly unsuccessful. No-till into previous pea cover crop successful.

Variety Trials

- 10 varieties from Ampac and PGG
  - 4 Turnip
  - 2 Rape
  - 1 each Radish, Swede, Kale, Chicory
- 3 trials
  - ELF Spring Planting, May 15
  - ELF Summer Planting, August 11
  - Crowe Farm Summer Planting, August 13
Spring Planting Results

- Very successful for one grazing.
- Not clear if multiple grazings were successful - may have been overgrazed on first grazing.

Yield of First Harvest, May Planting

- July 5 Harvest
- August 28 Harvest

Yield, Tons/Acre:

- Appin Tops
- Appin Total
- Graza
- Hunter
- Oasis
- Pasja
- Bonar
- Winfred
- New York Top
- New York Total
Economics: Conventional

- No-Till Establishment Costs:
  - $60/Acre
- FEEDVAL Conventional Crop Value:
  - Assume Corn @ 3.36/bu
  - Assume SBM @ 298/Ton
  - Assume 2 ton/A tops, 1 ton/A bulb
  - $495/Acre for New York Turnip
- Compare to $495/A Corn Silage

Economics: Organic

Plow-Till Establishment Costs:
- $80-$105/Acre
- FEEDVAL Organic Crop Value:
  - Assume Corn @ $12.04/bu
  - Assume SBM @ $1093/ton
  - Assume 2 ton/A tops, 1 ton/A bulb
  - $1735/Acre for New York Turnip
- Compare to $1800/A Corn Silage
Establishment Recommendations

- Drill vs. broadcast
- Tilled vs. No-Till
- Planting Date:
  - Spring Planting: Early May was good
  - Summer Planting: mid-August probably too late
- Interseed with clover/grass/chicory

Future Research?

- Compare with other crops
  - Sugarbeets/Mangels
  - Summer Annual Grasses
  - Perennial Pasture
- Optimize Planting and Harvest Dates
- Multiple grazing potential
