Franklin County Soil and Water Presents:

A Soil Health Workshop

Improving on-farm soil health is integral to ensuring productive, profitable, and sustainable agricultural operations while improving water, wildlife, and air quality. This event will feature live demonstrations of conservation tillage equipment; presentations from soil health experts; a panel of farmers practicing different tillage methods and cover cropping; and highlights of local cost share opportunities and programs.

**Friday - August 22, 2014 1-5 PM @**
