Keynote Speaker: Tom Kilcer of Advanced Ag Systems conducts contract research in private/public partnership with researchers at Cornell University, Cornell Cooperative Extension, and other colleges. On-farm analysis and consulting incorporates the latest research and alternative crops and cropping systems into your tool box of options for high yields of high quality forage. Tom has 34+ years as a private consultant and multi-county Field Crop and Soils Educator for Cornell Cooperative Extension of Rensselaer County.

“It is the crops that feed the livestock that make the meat and milk which creates the money.”

Supported by a Rural Business Development Grant and the Risk Management Agency
