THE FOOD ARMOR® PROGRAM
Reducing the Risk of Antibiotic Residues on your Dairy Operation

Food Armor® addresses food safety and long-term proper drug use on farms. Topics covered include:

- Veterinarian/Client/Patient Relationship
- Drug list
- Protocols
- Standard Operating Procedures
- Records
- Veterinary oversight

The objective of the Food Armor® program is to identify potential hazards and to identify critical control points to limit these hazards. Many residue issues result from poor communication and understanding by farm workers using legally approved drugs improperly. The dairy industry will face increasing pressure to reduce or eliminate antibiotic uses. Programs such as this provide a means to get our house in order without mandates from regulatory agencies.

Be proactive—plan to join us for this great program!

More information on the Food Armor program can be found at: http://www.foodarmor.org/.

Registration
$50.00 pre-registered by 02/01/16 - $75.00 at the door
“FSA Borrower Credits Available”

Contact your local Cornell Cooperative Extension if in need of further assistance with payment.

Registration includes lunch, materials and drawings for door prizes.
