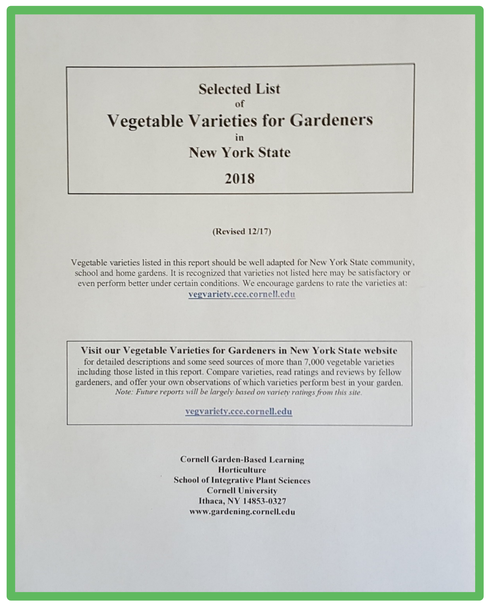
The VVTG project supports our citizen science project, **"Vegetable Varieties for Gardeners"**, an interactive site for variety ratings and links to seed sources.

CCE counties rate the varieties on the Vegetable Varieties for Gardeners web forum.

The data provided about the varieties contributes information used to create the annual "**Selected List of Vegetable Varieties for Gardeners in New York State**".



Selected List
of
Vegetable Varieties for Gardeners
in
New York State
2018

(Revised 12/17)

Vegetable varieties listed in this report should be well adapted for New York State community, school and home gardens. It is recognized that varieties not listed here may be satisfactory or even perform better under certain conditions. We encourage gardens to rate the varieties at:
vegvariety.cce.cornell.edu

Visit our Vegetable Varieties for Gardeners in New York State website
for detailed descriptions and some seed sources of more than 7,000 vegetable varieties including those listed in this report. Compare varieties, read ratings and reviews by fellow gardeners, and offer your own observations of which varieties perform best in your garden.
Note: Future reports will be largely based on variety ratings from this site.

"The Vegetable Variety Trials in the Master Gardener demo gardens continue to provide amazing yields from such a small space. The vast amounts of rain definitely helped give them a boost but there are definitely some fine gardening skills being demonstrated too.
